* Pixel shifting technology achieves Full HD resolution on screen.

¹ Colour brightness (colour light output) and white brightness (white light output) will vary depending on usage conditions. Colour light output measured in accordance with IDMS 15.4; white light output measured in accordance with ISO 21118.

² Maximum speed and range is achievable when used with same enhanced mode technology. Actual data rates, features and performance may vary depending on your computer system, the environment and other factors.

³ These modes and actual data throughputs depend on supported wireless mode of source devices and/or environmental conditions.

⁴ When environmental temperature becomes high, the brightness becomes dark automatically.

⁵ When used in the general office environment (the amount of floating dust: 0.04 - 0.2 mg/m³). Based on the Epson's in-house test results.

EPSON
EXCEED YOUR VISION

SEAMLESS COLLABORATION IN ULTRA-WIDE DISPLAYS.

Up your game and bring your presentations and learning experiences to life with Epson EB-1485Fi projector. Designed for meeting spaces and educational purposes, the ultra wide, super bright Full HD laser display allows image projection of up to 120" diagonal at the 16:6 ratio. A true PC-free digital whiteboard, the Epson EB-1485Fi projector allows you to draw, save, print, and even email without a computer.

Intuitive

design that enables you the limitless possibilities in creativity.

The master of collaborative devices, the Epson EB-1485Fi integrates the functions of a projector, whiteboard, and interactive display, transforming any flat surface into an interactive virtual space. Without using an additional computer or software, the projector allows users to turn it on and start writing or presenting immediately.

Offering 5,000 lumens of equal colour and white brightness, the EB-1485Fi presents a choice of either 100-inch 16:9 display or the new ultra-wide 120-inch 16:6 display. Delivering bright, true-to-life images to impactful presentations, the EB-1485Fi works splendidly even in well-lit rooms.

Ultra Bright Image Quality

An impressive 5,000 lumens of color/white brightness¹ with laser light source.

Wireless Integration

Wireless connectivity with Wi-Fi and Miracast support.

Quick & Easy Installation

Wall mount compatibility with HDBaseT connectivity via simple, intuitive user's interface.

Dual Screen Seamless Interactivity

Ultra wide screen enabling user to present one panoramic image.

Lower Total-Cost-of-Ownership

Maintenance free Laser Light Source with up to 20,000 light hours².

¹ Color brightness (color light output) and white brightness (white light output) will vary depending on usage conditions. Color light output measured in accordance with IDMS 15.4; white light output measured in accordance with ISO 21118.

² Approximate time until brightness decreases 50% from first usage. Measured by acceleration test assuming use of 0.04 - 0.20 mg/m3 of particulate matter. Time varies depending on usage conditions and environments.

Interactive

learning experience that stimulates inspirational knowledge exchange.

Imagine a classroom with a giant, interactive, and immersive digital drawing board instead of the traditional whiteboard. Operated by either a six-point multi-touch or two interactive pens, the Epson EB-1485Fi enhances the education experience by allowing end users the direct control of the education software that is projected on the screen. Users can now create immediate drawings, add on annotations, and share information onto other devices instantly.

When educators and students alike are given the opportunity to co-create and interact simultaneously on this large digital canvas, the lesson becomes enriching, stimulating, and fun.

Dual Screen Seamless Interactivity

Two projectors can be installed side by side to create an ultra-wide interactive panoramic screen of up to 180 inches diagonal.

Digital Whiteboard Capability

Enjoy up to 20 pages of digital whiteboard even with no PC connected.

Ultra Wide Display

The new 16:6 display allows maximization of the existing whiteboard, providing an ultra-wide display of 120 inches diagonal.

Seamless Edge Blending

Engage your audience in compelling and fascinating presentations on a larger seamless screen with two Epson EB-1485Fi projectors (with interactivity), or up to four (without interactivity) at any one time. With Epson EB-1485Fi's built-in edge blending function, you can now interact, control, and present immersive content seamlessly over one large panoramic screen.

Superior Image Quality

Enjoy a dynamic viewing experience with Full HD* resolution on screen with laser light source. Deliver vibrant and sharp high-resolution image displays from PCs, tablets and smartphones and watch your photos, 3D CAD, Blu-ray and online videos come to life in Full HD*. Data figures on spreadsheets and charts will also be displayed clearly for everyone to read accurately.

* Pixel shifting technology achieves Full HD resolution on screen.

No Reflection Glare On Projection

The projection screen is not glossy and does not cause glaring reflections of ambient light like florescent lamps and sunlight from windows.

Larger Images

With a wide projection screen size of up to 120 inches 16:6, you enjoy bigger image projection for greater visibility.

Ultra-short Throw Advantage

As light is not blocked by the presenter, less shadow is formed on the screen, allowing the audience to clearly see the information projected at all times.

Immersive

presentations through a collaborative
enterprise-level secured network.

The Epson EB-1485Fi connects people with technology, providing platforms for creative ideas, knowledge exchange, and collaborations across a wide variety of sectors where long life, minimal maintenance, and low cost of operation hold significant importance.

In addition to an enterprise-level security via integrated wireless networking, users can save, print, and email content directly from the interactive laser display. Wirelessly sharing content simultaneously from multiple devices with Miracast is also part of Epson EB-1485Fi's charm.

Ease of Installation

60% reduction on installation time*

*compared against current Epson interactive display products

Microsoft Ink Support

Draw and write on Microsoft PowerPoint, Excel or Word documents using Microsoft Office Ink

Quick Info Sharing

Enjoy great flexibility of importing and sharing information

Multi Location Interactivity

Up to 4 interactive projectors in different location can share the interactivity of the projector screen**

**Applicable only when connected to the same network, for example via VPN.

Wireless Connectivity

Project from your laptop or mobile wirelessly using Epson iProjection or Miracast Screen Mirroring respectively

Easy Installation Guide

Epson EB-1485Fi's new wall mount design makes installation a breeze. A single LAN cable is all you need to connect to the HDBaseT Control Box. Calibrate the screen with a simple one-click Auto Adjustment feature and the new, slimmer Finger Touch Unit allows for better motion detection.

Screen adjustment

Minimise image adjustment setup timings as compared to current interactive models.

Step 1

Set the markers on the target position.

Step 2

Roughly adjust projection image by using 3 axis adjustment.

Step 3

Run Auto Screen Adjustment.

Step 4

Complete.

FTU adjustment

Minimise the installation time as compared to current interactive models.

Step 1

Install FTU.

Step 2

Set marker.

Step 3

Run Auto FTU Adjustment.

Step 4

Checking the performance by touch 4 points.

New wall mount

3 axis adjustment part has changed to save the installation time and avoid the image vibration.

Lock dial to the image stability

Easy adjustment with free angle structure

HDBaseT solution

Simplified cabling to send both images and interactivity signals through just one LAN cable.

• Longer Transmission Distance

HDBaseT solutions can transmit 1080p signals up to a distance of 60m*.

• Cost Savings

Eliminates the need to purchase different cables for different signal types.

• Greater Compatibility

Compatible with all HDMI formats and supports all key features.

• Simple Installation

Reduces cable clutter and hence, simplifying the installation process.

* For 1080p resolution using Cat6a/Cat7 cable.

Wide Range of Connectivity

Quick information sharing

With the rich input-output options provided by the smart interactive projector platform, you can enjoy great flexibility of importing information from various sources and sharing the meeting results in multiple ways, saving you precious time and increasing productivity.

Import

Share

Project Documents, Photos, and More Wirelessly

Enjoy wireless projection via the Epson iProjection* app with your Chromebook or mobile devices. This powerful app allows you to share, manage, and annotate on displayed content from an easy-to-use, intuitive menu. iProjection* for Chromebooks supports fully mirrored display of all of your Chromebook content including Google Docs, Slides, Sheets, and the Chrome browser.

Using the iProjection App is easy:

1 Connect

Connect your PC/mobile device to the projector's wireless network.

2 Launch

Launch the app and select the connected projector.

3 Project

Select the content that you want to project and you're ready to go!

* In iProjection mode, projector profile search, multi-screen display, distribution function, audio transfer, movie file transfer, and encryption data transfer capabilities are not supported.

Laser Light Technology

Revolutionary Laser Light Source

Blue light from the laser is projected through a beam splitter, which divides the light into two beams. One beam is reflected by a phosphor wheel, changing it into yellow, while the other beam remains blue. The two beams are then recombined into white light and separated into red, green and blue through dichroic mirrors. Each of the three colours passes through LCD panels, producing three individual images, which are transmitted through a prism and combined into the final full-colour image.

Inorganic LCD Panels and Phosphor Wheel for Outstanding Reliability

Made of inorganic material, Epson's newly developed phosphor wheel offers superior light and heat resistance to deliver excellent reliability. By combining this with our inorganic LCD panels, we create laser projectors that project bright, vibrant images for extremely long periods.

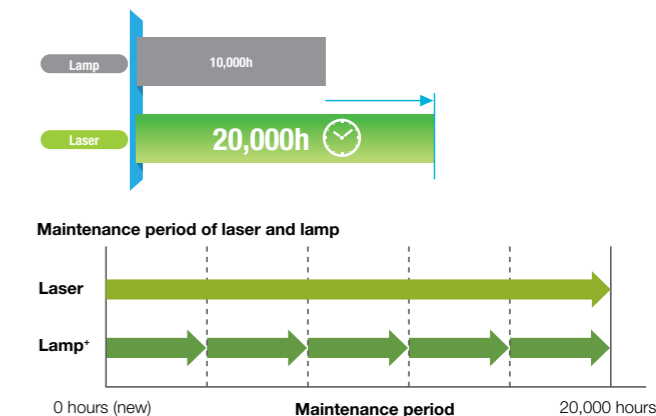

Longer Light Hours – Up to 20,000 Hours of Maintenance-free Use

Engineered with inorganic LCD panels and an inorganic phosphor wheel, this newly designed laser light source delivers 20,000 hours[^] of maintenance-free use. And with the advanced electrostatic filter having an equally long-lasting life. Cut down on the frequency of lamp replacements, saving you time and money, and lowering the total cost of ownership.

Organic vs. Inorganic

	Inorganic (Glass, iron, aluminum, etc.)	Organic (Paper, wood, plastic, etc.)
Light-resistance	YES	NO
Heat-resistance	YES	NO

Unlike organic substances, inorganic substances do not contain carbon.

* Compared with other conventional lamp projector that has lamp life of 4000 hours.

[^] Approximate time until brightness decreases 50% from first usage. Measured by acceleration test assuming use of 0.04 - 0.20 mg/m3 of particulate matter. Time varies depending on usage conditions and environments.

Eco Features

- Uses just 0.3W of power in standby mode
- Projector optics employ lead-free lenses
- Unpainted plastic housing reduces the environment impact
- The flame retardants used in the plastic housing do not contain chlorine or bromine
- Laser light technology* eliminates the need for lamp replacements
